Configuration File Reference Chart

The system configuration files have the ***.scf** extension, and they use the following basic syntax:

```
<parameter> ::= "["<identifier>"]" "=" <parameter-options>
<property> ::= "{"<identifier>"}" "=" <property-options>

<parameter-options> ::= (<Init> | <Default> | <User> | <System>)
<property-options> ::= (<Default> | <User>)

<Init> ::= "INIT" identifier
<Default> ::= "DEFAULT" identifier
<User> ::= "USER" identifier
<System> ::= "SYSTEM" identifier

<identifier> ::= <letter> | (<numbers> | <letters>)*
<letters> ::= <letter>+
<letter> ::= "a" .. "z" | "A" .. "Z"
<numbers> ::= <number>+
<number> ::= 0 .. 9
```

Below is a quick reference table detailing the syntax of the ***.scf** files.

Item	Purpose	Use
[*<key>*]=*<value>*	Parameter declaration and definition	[disk_size]=4096
{*<key>*}=*<value>*	Property declaration and definition	{block_aligned}=true
